

# Buckeye Summer Camp

## Event Agenda

Saturday, July 28, 2018 at 7:30am ET - 4:30pm ET

**i** All times listed in Eastern Time (US & Canada).

### Saturday, July 28, 2018

7:30am - 8:00am

**Registration Open~ Continental Breakfast and Drinks Included**

---

8:00am - 8:15am

**Welcoming Remarks and Opening**

Anne Buescher, BSN, RN, CRNI, VA-BC

Opening remarks per Local INS member and previous President-Elect

---

8:15am - 9:15am

**Session 1~ Pediatric Midline Use**

Lesa Combs, RN, CPN, sponsored by Vascular Access on Demand.

1.0 CE Credit

Cincinnati Children's Vascular Access Team Member discusses midline use in the pediatric population. Sponsored by Vascular Access On Demand.

Lesa will discuss the importance of vascular access device planning for the administration of peripheral infusion therapy. Will also discuss the advantages and disadvantages of midline catheters.

---

9:15am - 10:15am

**Session 2~ Catheter-Related Thrombosis**

Jon Martin, sponsored by Angiodynamics.

1.0 CE Credit

Catheter related thrombosis discussion per Jon Martin, sponsored by Angiodynamics.

---

10:15am - 10:30am

**Break**

Vendors will be available in Vendor Hall during breaks and lunch.

---

10:30am - 11:30am

**Session 3~ Managing Hospital Acquired Conditions: A Focus on CLABSI**

Ryan Lemon, Sponsored by BD.

1.0 CE Credit

This presentation will review Hospital Acquired Conditions (HAC) and Value Based Purchasing (VBP), reviewing CLABSI's role in regards to HAC and VBP. Discussing the Standardized Infection Rate (SIR), case studies of the CLABSI impact, CLABSI mitigation, will review surveillance results and utilize to find strategies to lessen CLABSI impact.

---

11:30am - 12:30pm

**Session 4~Moving the Needle**

Darla Tarvin, RN, sponsored by Teleflex.

1.0 CE Credit

There are many vascular access and infusion therapy professionals that have vast knowledge and skills in regards to vascular access that may not be utilized in their practice. This abstract will bring to the surface the realization to those professionals that they can expand on their practice by using their knowledge in vascular access, anatomy, and infusion therapy. The presenter will discuss ways to assist the professional in getting through some of the common pitfalls in this process and share her journey in expanding her scope of practice. At the end of this presentation the listener will be able to identify that they may have knowledge and/ or skills that are not being used fully and my enable them to expand on them at their institution.

---

12:30pm - 1:45pm

**Lunch**

Lunch will be catered. Please stop by Vendor Hall for break out sessions!

---

1:45pm - 2:45pm

**Session 5~ Tissue Adhesive: A New Tool for Your Vascular Access Toolbox**

Leigh Ann Bowe-Geddes, RN, CRNI, VA-BC, sponsored by Clinical Technologies.

1.0 CE Credit

Skin integrity is lost with puncture for insertion of all vascular access devices (VAD). Additional skin injury can be associated with antiseptics and other medical adhesive devices. To prevent loss of the VAD and injury to blood vessels and other structures, the VAD requires adequate securement and protection. Publications over the last decade reveal several purposes and favorable outcomes when tissue adhesives (TA) are used with both peripheral and central VADs. The evidence suggests positive results in increased dwell times and a reduction in unplanned dressing changes. TA has bactericidal properties and seals the puncture site preventing migration of bacteria into the insertion site. This presentation will review the evidence and describe the benefits of adding TA to the tool box of preventative technologies you can use to improve the vascular access experience for patients

---

2:45pm - 3:45pm

**Session 6~Ohio Law CE**

David Newman, RN

1.0 CE Credit

Get your required Ohio Law CE!

David's presentation will introduce the RNs role in discussing code status including laws and rules in the nursing scope of practice.

---

3:45pm - 4:30pm

**Closing Remarks~Housekeeping Items**
